## COMPANY PROFILE

Established in 1998, **Asphatech Limited** is a specialty asphaltic coating manufacturer & installer. We can serve many projects with solutions. Our services are blending asphalt into a liquid state, either water-based or solvent-based. This blend can be transformed into different categories from fast-drying to slow drying, or for wet or dry surfaces and processing of coatings to fill cracks on roadways from 1/8 - 1/4 of an inch.

Roadways done with our technology are more sealed against water penetration to the sub-layer. Damp concrete surfaces can be waterproofed with our quick-dry formula.

With new technologies being developed, **Asphatech Ltd** will be able to blend a better pot hole patch lasting beyond twelve (12) months.

**Asphatech Ltd. has successfully installed our speciality ROAD SEAL on the roadway at the Diplomatic Centre in 2009 and for 5 years that surface had no potholes existing on the treated area.**

Our coatings can be used to prevent moisture & corrosion on bridges, wood or steel structures, waterproof tunnels and inverts or box drains that are needed to be put into use almost immediately. Our products can be used for cast iron pipes, pot hole patching and repairing of alligator cracked surfaces. You can brighten the look of an old faded asphalt surface such as a parking area for an exhibit, etc. We also have solutions for dust control for off-road or gravel roads used by trucks or oilfield exploration.

**Asphatech Ltd** is the only company involved in this type of specialty work locally & we have been doing this since 1998. Our materials have been used in petroleum and non-petroleum companies.

Our **Gator Grip** range of asphalt sealants are the **Marine Grade Bitumenous Black, Premium Fibrated Roof Patch, Semi-Plastic Bitumen, Mastic Cement and Automotive Seam Sealer**

These have been used on some major projects namely the **Vinci Over Pass Project, on Methanex Trinidad Ltd. Ispat Computer Rooms, British Gas Head Office and on many road side retaining walls.**

## OUR CLIENTS:

1. HYATT
2. BP
3. AMOCO

4. PETROTRIN
5. BRITISH GAS
6. ATLANTIC LNG

7. NGC
8. LIFETIME ROOFING SOLUTIONS
